

# New Handpiece Design

Active Optical Systems Ltd. Is glad to present the new Multi-Purpose-Handpiece

Starting February 1<sup>st</sup>, 2010, The **Multi-Purpose-Handpiece** replaces the appreciated **Universal-Handpiece** (a/n AC-06) and offers the following innovations:

- Contemporary and Stylish Design
- 25% Lighter
- Convenient access to all components
- The ability to replace on site a broken or a used up Optical Crystal

The new Handpiece fits perfectly to all existing models (**Crystal, Record & Optima**) and uses the existing type of lamp.

However, the "Hand Electrode Wires" of the Universal Handpiece does not fit the new Handpiece. Thus, a client that wishes to change to the new Handpiece would need to purchase a complete one (excluding the lamp).

On request, **Active** will replace any **unused** Universal-Handpiece with the new type, charging for shipping only.

**Active Optical Systems Ltd** strives to meet the ever changing demands of the Medical-Esthetical market and is committed to offer new and appealing products which support your continuous sales efforts.
